Fairytrail Bride® Cascade Hydrangea®

Hydrangea 'USHYD0405'

Height: 4 feet

Spread: 4 feet

Sunlight: ◐

Hardiness Zone: 6

Description:

This exciting shrub is a cascading hydrangea with a unique horizontal, trailing habit; frilly, lacy, pale pink and white blooms look great in hanging baskets, containers, or cascading over walls; blooms over summer on old wood

Ornamental Features

Fairytrail Bride Cascade Hydrangea features bold semi-double white lacecap flowers with shell pink overtones at the ends of the branches from early to late summer. The flowers are excellent for cutting. It has dark green deciduous foliage. The serrated pointy leaves do not develop any appreciable fall color.

Landscape Attributes

Fairytrail Bride Cascade Hydrangea is a dense multi-stemmed deciduous shrub with a ground-hugging habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This shrub will require occasional maintenance and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. It is a good choice for attracting bees, butterflies and hummingbirds to your yard. It has no significant negative characteristics.

Fairytrail Bride Cascade Hydrangea is recommended for the following landscape applications;

- Accent
- Mass Planting
- Border Edging
- General Garden Use
- Container Planting

Planting & Growing

Fairytrail Bride Cascade Hydrangea will grow to be about 4 feet tall at maturity, with a spread of 4 feet. It has a low canopy. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub does best in a location that gets morning sunlight but is shaded from the hot afternoon sun, although it will also grow in partial shade. Keep it away from hot, dry locations that receive direct afternoon sun or which get reflected sunlight, such as against the south side of a white wall. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It may require supplemental watering during periods of drought or extended heat. To help this plant achive its best flowering performance, periodically apply a flower-boosting fertilizer from early spring through into the active growing season. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. Consider applying a thick mulch around the root zone in winter to protect it in exposed locations or colder microclimates. This particular variety is an interspecific hybrid.

Fairytrail Bride Cascade Hydrangea makes a fine choice for the outdoor landscape, but it is also well-suited for use in outdoor pots and containers. Because of its spreading habit of growth, it is ideally suited for use as a 'spiller' in the 'spiller-thriller-filler' container combination; plant it near the edges where it can spill gracefully over the pot. It is even sizeable enough that it can be grown alone in a suitable container. Note that when grown in a container, it may not perform exactly as indicated on the tag - this is to be expected. Also note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
