Description:

This elegant selection re-blooms throughout the season with hot pink flowers; abundant blooms on each flush; will make a stunning visual impact along walkways, borders, or in the garden; excellent disease resistance

Ornamental Features

Brick House Pink Rose features showy semi-double hot pink flowers at the ends of the branches from late spring to mid fall. The flowers are excellent for cutting. It has forest green deciduous foliage. The glossy oval compound leaves do not develop any appreciable fall color.

Landscape Attributes

Brick House Pink Rose is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This shrub will require occasional maintenance and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. It is a good choice for attracting bees to your yard. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Spiny

Brick House Pink Rose is recommended for the following landscape applications;

- Mass Planting
- Hedges/Screening
- General Garden Use

Planting & Growing

Brick House Pink Rose will grow to be about 30 inches tall at maturity, with a spread of 30 inches. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 30 years.

This shrub does best in full sun to partial shade. It does best in average to evenly moist conditions, but will not tolerate standing water. It may require supplemental watering during periods of drought or extended heat. This plant should not require much in the way of fertilizing once established, although it may appreciate a shot of general-purpose fertilizer from time to time early in the growing season. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid.
