Height: 12 inches

Spread: 18 inches

Sunlight:

Hardiness Zone: 4

Description:

Stunning low growing mounds of golden yellow-chartreuse foliage feature cherry-red daisy-like flowers throughout the summer season and into the fall; excellent in containers, borders or garden landscapes; easy to grow, requiring little maintenance

Ornamental Features

Strawberry Lemonade Tickseed is smothered in stunning cherry red daisy flowers with harvest gold eyes at the ends of the stems from early summer to early fall. The flowers are excellent for cutting. Its attractive ferny leaves emerge yellow in spring, turning chartreuse in color throughout the season.

Landscape Attributes

Strawberry Lemonade Tickseed is an herbaceous perennial with a mounded form. It brings an extremely fine and delicate texture to the garden composition and should be used to full effect.

This is a relatively low maintenance plant, and is best cleaned up in early spring before it resumes active growth for the season. It is a good choice for attracting butterflies to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. It has no significant negative characteristics.

Strawberry Lemonade Tickseed is recommended for the following landscape applications;

- Mass Planting
- Rock/Alpine Gardens
- Border Edging
- General Garden Use
- Container Planting

Planting & Growing

Strawberry Lemonade Tickseed will grow to be about 12 inches tall at maturity, with a spread of 18 inches. Its foliage tends to remain dense right to the ground, not requiring facer plants in front. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years. As an herbaceous perennial, this plant will usually die back to the crown each winter, and will regrow from the base each spring. Be careful not to disturb the crown in late winter when it may not be readily seen!

This plant should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It may require supplemental watering during periods of drought or extended heat. It is not particular as to soil pH, but grows best in poor soils. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Strawberry Lemonade Tickseed is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers and foliage against which the thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
