Height: 5 feet

Spread: 18 inches

Spacing: 18 inches

Sunlight:

Hardiness Zone: (annual)

Description:

Mainly grown for its esthetic appeal, this variety is a must have in summer gardens and containers; tall sturdy stalks produce ears of corn full of rich red kernels; edible when used for hominy and polenta; a beautiful addition to autumnal décor

Edible Qualities

Floriani Red Flint Corn is an annual vegetable plant that is commonly grown for its edible qualities. It produces cobs of burgundy long kernels with antique red overtones which are typically harvested when mature. The kernels will often fade to creamy white over time. The kernels have a pleasant taste.

The kernels are most often used in the following ways:

- Cooking
- Drying

Planting & Growing

Floriani Red Flint Corn will grow to be about 5 feet tall at maturity, with a spread of 18 inches. When planted in rows, individual plants should be spaced approximately 18 inches apart. This fast-growing vegetable plant is an annual, which means that it will grow for one season in your garden and then die after producing a crop.

This plant is typically grown in a designated vegetable garden. It should only be grown in full sunlight. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It may require supplemental watering during periods of drought or extended heat. This plant is a heavy feeder that requires frequent fertilizing throughout the growing season to perform at its best. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This is a selection of a native North American species.

Floriani Red Flint Corn is a good choice for the vegetable garden, but it is also well-suited for use in outdoor pots and containers. Because of its height, it is often used as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
