Plant Height: 16 inches

Flower Height: 24 inches

Spread: 7 inches

Spacing: 7 inches

Sunlight: ○

Hardiness Zone: (annual)

Other Names: Solsation Yellow

**Description:**

This spectacular compact variety has warm yellow blooms dark brown centers on well branched plants; low maintenance and mildew tolerant; excellent for sunny spaces at the back of borders, or containers; long flowering period; pollen-free

**Ornamental Features**

Sunsation Yellow Sunflower has masses of beautiful double yellow daisy flowers with brown eyes at the ends of the stems from mid summer to mid fall, which are most effective when planted in groupings. The flowers are excellent for cutting. Its serrated pointy leaves remain green in color throughout the season.

**Landscape Attributes**

Sunsation Yellow Sunflower is an herbaceous annual with an upright spreading habit of growth. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This is a relatively low maintenance plant. Trim off the flower heads after they fade and die to encourage more blooms late into the season. It is a good choice for attracting birds to your yard. It has no significant negative characteristics.

Sunsation Yellow Sunflower is recommended for the following landscape applications;

- Accent
- Mass Planting
- General Garden Use
- Container Planting

**Planting & Growing**

Sunsation Yellow Sunflower will grow to be about 16 inches tall at maturity extending to 24 inches tall with the flowers, with a spread of 7 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 7 inches apart. This fast-growing annual will normally live for one full growing season, needing replacement the following year.

This plant should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It may require supplemental watering during periods of drought or extended heat. This plant should not require much in the way of fertilizing once established, although it may appreciate a shot of general-purpose fertilizer from time to time early in the growing season. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selection of a native North American species.

Sunsation Yellow Sunflower is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. With its upright habit of growth, it is best suited for use as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
