Height: 4 feet

Spread: 5 feet

Sunlight: ○ ◐

Hardiness Zone: 10

Other Names: Sweet Clock Vine, King's Mantle, Potato Bush

Description:

An erect, sometimes twining, evergreen shrub presenting small ovate leaves and stunning lavender flowers with white edges throughout summer and fall; perfect for foundations, hedges, beds and borders, trained on trellises or cascading down walls

Ornamental Features

Fairy Moon Bush Clock Vine features bold clusters of lightly-scented lavender trumpet-shaped flowers with yellow throats and white edges along the branches from early summer to mid fall, which emerge from distinctive creamy white flower buds. It has dark green evergreen foliage. The small glossy oval leaves remain dark green throughout the winter.

Landscape Attributes

Fairy Moon Bush Clock Vine is a multi-stemmed evergreen shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This shrub will require occasional maintenance and upkeep, and can be pruned at anytime. It is a good choice for attracting butterflies to your yard. It has no significant negative characteristics.

Fairy Moon Bush Clock Vine is recommended for the following landscape applications;

- Accent
- Mass Planting
- Hedges/Screening
- Border Edging
- General Garden Use
- Groundcover
- Container Planting

Planting & Growing

Fairy Moon Bush Clock Vine will grow to be about 4 feet tall at maturity, with a spread of 5 feet. It has a low canopy with a typical clearance of 1 foot from the ground. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 5 years.

This shrub does best in full sun to partial shade. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It may require supplemental watering during periods of drought or extended heat. To help this plant achive its best flowering performance, periodically apply a flower-boosting fertilizer from early spring through into the active growing season. It is not particular as to soil pH, but grows best in rich soils. It is somewhat tolerant of urban pollution. This is a selected variety of a species not originally from North America. It can be propagated by cuttings; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Fairy Moon Bush Clock Vine makes a fine choice for the outdoor landscape, but it is also well-suited for use in outdoor pots and containers. With its upright habit of growth, it is best suited for use as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when grown in a container, it may not perform exactly as indicated on the tag - this is to be expected. Also note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
