Height: 12 inches

Spread: 10 inches

Spacing: 12 inches

Sunlight:

Hardiness Zone: (annual)

Description:

A wonderful cool weather performer, ideal for short growing seasons; producing small, slender heads of green leaves with white mid ribs that turn intense red when cool weather arrives; bitter and spicy flavor, great for salads, grilled or roasted

Edible Qualities

Rossa Di Treviso Radicchio is an annual vegetable plant that is typically grown for its edible qualities. The oval green leaves with pointy white spines and tinges of ruby-red are usually harvested from mid spring to mid fall. The leaves have a bitter taste.

The leaves are most often used in the following ways:

- Fresh Eating
- Eating When Cooked/Prepared
- Cooking

Planting & Growing

Rossa Di Treviso Radicchio will grow to be about 12 inches tall at maturity, with a spread of 10 inches. When planted in rows, individual plants should be spaced approximately 12 inches apart. This fast-growing vegetable plant is an annual, which means that it will grow for one season in your garden and then die after producing a crop. Because of its relatively short time to maturity, it lends itself to a series of successive plantings each staggered by a week or two; this will prolong the effective harvest period.

This plant is typically grown in a designated vegetable garden. It should only be grown in full sunlight. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It may require supplemental watering during periods of drought or extended heat. This plant does not require much in the way of fertilizing once established. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selected variety of a species not originally from North America.

Rossa Di Treviso Radicchio is a good choice for the vegetable garden, but it is also well-suited for use in outdoor pots and containers. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing the canvas against which the larger thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
