Height: 12 inches

Spread: 18 inches

Spacing: 18 inches

Sunlight:

Hardiness Zone: 3

Description:

A wonderful aromatic bushy variety featuring small, ovate green foliage tipped with eye-catching golden yellow; drought tolerant once established; small pink flowers emerge in mid summer and early fall; a tasty edible selection perfect for various dishes

Edible Qualities

Gold Tip Oregano is a perennial herb that is commonly grown for its edible qualities, although it does have ornamental merits as well. The fragrant oval green leaves with prominent gold tips can be harvested at any time in the season. The leaves have a distinctive taste and a distinctive fragrance.

The leaves are most often used in the following ways:

- Cooking
- Seasoning

Features & Attributes

Gold Tip Oregano's attractive tiny fragrant oval leaves remain green in color with prominent gold tips throughout the season on a plant with a mounded habit of growth. It features tiny pink trumpet-shaped flowers in mid summer.

This is an herbaceous perennial herb with a mounded form. It brings an extremely fine and delicate texture to the garden composition and should be used to full effect. This is a relatively low maintenance plant, and should be cut back in late fall in preparation for winter. It is a good choice for attracting butterflies to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. It has no significant negative characteristics.

Aside from its primary use as an edible, Gold Tip Oregano is sutiable for the following landscape applications;

- Border Edging
- General Garden Use
- Groundcover
- Herb Gardens
- Container Planting

Planting & Growing

Gold Tip Oregano will grow to be about 12 inches tall at maturity, with a spread of 18 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 18 inches apart. Its foliage tends to remain dense right to the ground, not requiring facer plants in front. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 5 years. As an herbaceous perennial, this plant will usually die back to the crown each winter, and will regrow from the base each spring. Be careful not to disturb the crown in late winter when it may not be readily seen!

This plant can be integrated into a landscape or flower garden by creative gardeners, but is usually grown in a designated herb garden. It should only be grown in full sunlight. It prefers dry to average moisture levels with very well-drained soil, and will often die in standing water. It is considered to be drought-tolerant, and thus makes an ideal choice for a low-water garden or xeriscape application. This plant should not require much in the way of fertilizing once established, although it may appreciate a shot of general-purpose fertilizer from time to time early in the growing season. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This is a selected variety of a species not originally from North America. It can be propagated by cuttings; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Gold Tip Oregano is a good choice for the edible garden, but it is also well-suited for use in outdoor pots and containers. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers and foliage against which the thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
