Poker Heuchera

Heuchera cylindrica

Plant Height: 12 inches

Flower Height: 30 inches

Spread: 18 inches

Spacing: 12 inches

Sunlight: ◐

Hardiness Zone: 4

Other Names: Poker Coralbells, Roundleaf Alumroot

Description:

A unique, beautiful mounded variety presenting leathery, maple-like, deep green foliage; spikes of densely packed cream flowers appear above the foliage in early summer; an easy to grow choice for borders, beds and containers; suitable for cutting

Ornamental Features

Poker Heuchera features showy spikes of creamy white cup-shaped flowers with chartreuse overtones rising above the foliage from late spring to mid summer. The flowers are excellent for cutting. Its serrated lobed leaves emerge light green in spring, turning dark green in color the rest of the year.

Landscape Attributes

Poker Heuchera is a dense herbaceous evergreen perennial with tall flower stalks held atop a low mound of foliage. Its relatively fine texture sets it apart from other garden plants with less refined foliage.

This is a relatively low maintenance plant, and should be cut back in late fall in preparation for winter. It is a good choice for attracting hummingbirds to your yard. It has no significant negative characteristics.

Poker Heuchera is recommended for the following landscape applications;

- Mass Planting
- Rock/Alpine Gardens
- Border Edging
- General Garden Use
- Groundcover
- Container Planting

Planting & Growing

Poker Heuchera will grow to be about 12 inches tall at maturity extending to 30 inches tall with the flowers, with a spread of 18 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 12 inches apart. Its foliage tends to remain dense right to the ground, not requiring facer plants in front. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years. As an evegreen perennial, this plant will typically keep its form and foliage year-round.

This plant does best in a location that gets morning sunlight but is shaded from the hot afternoon sun, although it will also grow in partial shade. Keep it away from hot, dry locations that receive direct afternoon sun or which get reflected sunlight, such as against the south side of a white wall. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It may require supplemental watering during periods of drought or extended heat. This plant should not require much in the way of fertilizing once established, although it may appreciate a shot of general-purpose fertilizer from time to time early in the growing season. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. Consider applying a thick mulch around the root zone in winter to protect it in exposed locations or colder microclimates. This species is native to parts of North America. It can be propagated by division.

Poker Heuchera is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. With its upright habit of growth, it is best suited for use as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
