

Mini Pixie Arrowhead Vine

Syngonium podophyllum 'Mini Pixie'

Height: 8 inches

Spread: 12 inches

Sunlight: ◐ ●

Hardiness Zone: 10

Other Names: Dwarf Arrowhead Plant

Description:

A lovely small and compact variety that is perfect for indoor containers and hanging baskets; reaching about 8" in height, its beautiful deep green leaves put on a show with its creamy white variegation; easy to grow and low maintenance

Features & Attributes

Mini Pixie Arrowhead Vine's attractive small heart-shaped leaves remain dark green in color with showy white variegation throughout the year on a plant with a trailing habit of growth.

This is an herbaceous evergreen houseplant with a trailing habit of growth, eventually spilling over the edges of hanging baskets and containers. This plant can be pruned at any time to keep it looking its best.

Planting & Growing

When grown indoors, Mini Pixie Arrowhead Vine can be expected to grow to be about 8 inches tall at maturity, with a spread of 12 inches. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 10 years. This houseplant performs well in both bright or indirect sunlight and strong artificial light, and can therefore be situated in almost any well-lit room or location. It prefers to grow in average to moist soil. The surface of the soil shouldn't be allowed to dry out completely, and so you should expect to water this plant once and possibly even twice each week. Be aware that your particular watering schedule may vary depending on its location in the room, the pot size, plant size and other conditions; if in doubt, ask one of our experts in the store for advice. It will benefit from a regular feeding with a general-purpose fertilizer with every second or third watering. It is not particular as to soil pH, but grows best in rich soil. Contact the store for specific recommendations on pre-mixed potting soil for this plant. Be warned that parts of this plant are known to be toxic to humans and animals, so special care should be exercised if growing it around children and pets.

There are many factors that will affect the ultimate height, spread and overall performance of a plant when grown indoors; among them, the size of the pot it's growing in, the amount of light it receives, watering frequency, the pruning regimen and repotting schedule. Use the information described here as a guideline only; individual performance can and will vary. Please contact the store to speak with one of our experts if you are interested in further details concerning recommendations on pot size, watering, pruning, repotting, etc.

-- THIS IS A HOUSEPLANT AND IS NOT MEANT TO SURVIVE THE WINTER OUTDOORS IN OUR CLIMATE --
