Summerburst® Golden Rain Tree

Koelreuteria paniculata 'JFS-Sunleaf'

Height: 30 feet

Spread: 30 feet

Sunlight:

Hardiness Zone: 5

Other Names: Varnish Tree, Pride of India

Description:

An exceptional small ornamental tree with airy panicles of golden yellow flowers in mid summer followed by prominent rose-pink lantern-shaped fruit in fall, beautiful fall color; appreciated for its symmetry, heat resistance, and improved foliage

Ornamental Features

Summerburst Golden Rain Tree features airy plumes of yellow flowers rising above the foliage in mid summer. It features abundant showy pink capsules from early to mid fall. It has dark green deciduous foliage. The glossy pinnately compound leaves turn outstanding shades of yellow and in the fall. The furrowed gray bark adds an interesting dimension to the landscape.

Landscape Attributes

Summerburst Golden Rain Tree is a dense deciduous tree with a more or less rounded form. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This tree will require occasional maintenance and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Messy

Summerburst Golden Rain Tree is recommended for the following landscape applications;

- Accent
- Shade

Planting & Growing

Summerburst Golden Rain Tree will grow to be about 30 feet tall at maturity, with a spread of 30 feet. It has a low canopy with a typical clearance of 4 feet from the ground, and should not be planted underneath power lines. It grows at a medium rate, and under ideal conditions can be expected to live for 60 years or more.

This tree should only be grown in full sunlight. It is very adaptable to both dry and moist locations, and should do just fine under average home landscape conditions. It is considered to be drought-tolerant, and thus makes an ideal choice for xeriscaping or the moisture-conserving landscape. This plant will benefit from an application of bonemeal and/or mycorrhizal fertilizer at the time of planting. It is not particular as to soil type or pH, and is able to handle environmental salt. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selected variety of a species not originally from North America, and parts of it are known to be toxic to humans and animals, so care should be exercised in planting it around children and pets.
