Galactic Pink® Chaste Tree

Vitex agnus-castus 'BAILTEXTWO'

Height: 8 feet

Spread: 8 feet

Sunlight: ○ ◐

Hardiness Zone: 6

Description:

An intermediate sized shrub with long, airy spikes of soft pink, fragrant flowers throughout the summer over distinctive palmate leaves; can be treated like a perennial and cut back each spring, as it flowers on new wood and regrows vigorously

Ornamental Features

Galactic Pink Chaste Tree has panicles of lightly-scented shell pink flowers rising above the foliage from early summer to early fall. It has green deciduous foliage. The fragrant palmate leaves do not develop any appreciable fall color.

Landscape Attributes

Galactic Pink Chaste Tree is an open multi-stemmed deciduous shrub with a more or less rounded form. Its relatively fine texture sets it apart from other landscape plants with less refined foliage.

This shrub will require occasional maintenance and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. Deer don't particularly care for this plant and will usually leave it alone in favor of tastier treats. It has no significant negative characteristics.

Galactic Pink Chaste Tree is recommended for the following landscape applications;

- Mass Planting
- Hedges/Screening
- General Garden Use

Planting & Growing

Galactic Pink Chaste Tree will grow to be about 8 feet tall at maturity, with a spread of 8 feet. It tends to be a little leggy, with a typical clearance of 1 foot from the ground, and is suitable for planting under power lines. It grows at a fast rate, and under ideal conditions can be expected to live for 50 years or more.

This shrub does best in full sun to partial shade. It is very adaptable to both dry and moist locations, and should do just fine under average home landscape conditions. It is considered to be drought-tolerant, and thus makes an ideal choice for xeriscaping or the moisture-conserving landscape. To help this plant achive its best flowering performance, periodically apply a flower-boosting fertilizer from early spring through into the active growing season. It is not particular as to soil type or pH, and is able to handle environmental salt. It is highly tolerant of urban pollution and will even thrive in inner city environments, and will benefit from being planted in a relatively sheltered location. This is a selected variety of a species not originally from North America.
