Height: 4 inches

Spread: 16 inches

Spacing: 12 inches

Sunlight: ◐ ●

Hardiness Zone: 3

Other Names: Moneywort

Description:

A spectacular groundcover choice, that is not overly aggressive, with uniquely paired bright lime-gold leaves all season, and attractive yellow flowers throughout the summer; almost indestructible, a colorful trailing plant for indoor containers

Features & Attributes

Goldii Creeping Jenny is smothered in stunning lightly-scented gold cup-shaped flowers along the stems from late spring to mid summer. Its attractive round leaves emerge yellow, turning gold in color with showy lime green variegation throughout the year.

This is a dense spreading houseplant with a spreading, ground-hugging habit of growth. Its relatively fine texture sets it apart from other indoor plants with less refined foliage. This plant should not require much pruning, except when necessary to keep it looking its best.

Planting & Growing

When grown indoors, Goldii Creeping Jenny can be expected to grow to be only 4 inches tall at maturity, with a spread of 16 inches. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 10 years. This houseplant performs well in both bright or indirect sunlight and strong artificial light, and can therefore be situated in almost any well-lit room or location. It prefers to grow in average to moist soil. The surface of the soil shouldn't be allowed to dry out completely, and so you should expect to water this plant once and possibly even twice each week. Be aware that your particular watering schedule may vary depending on its location in the room, the pot size, plant size and other conditions; if in doubt, ask one of our experts in the store for advice. It will benefit from a regular feeding with a general-purpose fertilizer with every second or third watering. It is not particular as to soil type or pH; an average potting soil should work just fine.

There are many factors that will affect the ultimate height, spread and overall performance of a plant when grown indoors; among them, the size of the pot it's growing in, the amount of light it receives, watering frequency, the pruning regimen and repotting schedule. Use the information described here as a guideline only; individual performance can and will vary. Please contact the store to speak with one of our experts if you are interested in further details concerning recommendations on pot size, watering, pruning, repotting, etc.

-- THIS IS A HOUSEPLANT AND IS NOT MEANT TO SURVIVE THE WINTER OUTDOORS IN OUR CLIMATE --
