Height: 3 feet

Spread: 5 feet

Sunlight:

Hardiness Zone: 5

Group/Class: Shrub Rose

Description:

This old-fashioned spreading shrub rose is covered in large, rich apricot blooms with a fruity-lemon fragrance; repeat blooming throughout the growing season; a charming addition to garden beds, borders and fresh cut arrangements

Ornamental Features

Fighting Temeraire Rose is covered in stunning lightly-scented peach flowers with yellow centers at the ends of the branches from late spring to early fall. The flowers are excellent for cutting. It has dark green deciduous foliage. The oval compound leaves turn orange in fall.

Landscape Attributes

Fighting Temeraire Rose is a multi-stemmed deciduous shrub with a ground-hugging habit of growth. Its relatively fine texture sets it apart from other landscape plants with less refined foliage.

This is a high maintenance shrub that will require regular care and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. It is a good choice for attracting bees and butterflies to your yard. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Spiny

Fighting Temeraire Rose is recommended for the following landscape applications;

- Mass Planting
- Hedges/Screening
- General Garden Use

Planting & Growing

Fighting Temeraire Rose will grow to be about 3 feet tall at maturity, with a spread of 5 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It may require supplemental watering during periods of drought or extended heat. To help this plant achive its best flowering performance, periodically apply a flower-boosting fertilizer from early spring through into the active growing season. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid.
