Height: 4 feet

Spread: 3 feet

Sunlight: ○

Hardiness Zone: 4

Group/Class: Shrub Rose

Description:

An excellent choice for mass plantings, this hardy shrub displays an abundance of captivating tangerine orange blooms with yellow-orange on the outside of the petals; upright, broad and bushy habit strong fruity fragrance; repeat bloomer

Ornamental Features

Lady Emma Hamilton Rose is clothed in stunning fragrant double orange cup-shaped flowers with yellow overtones at the ends of the branches from late spring to early fall, which emerge from distinctive dark red flower buds. The flowers are excellent for cutting. It has dark green deciduous foliage which emerges coppery-bronze in spring. The glossy oval compound leaves do not develop any appreciable fall color. The fruits are showy red hips displayed in late fall.

Landscape Attributes

Lady Emma Hamilton Rose is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This shrub will require occasional maintenance and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Spiny

Lady Emma Hamilton Rose is recommended for the following landscape applications;

- Mass Planting
- Hedges/Screening
- General Garden Use
- Container Planting

Planting & Growing

Lady Emma Hamilton Rose will grow to be about 4 feet tall at maturity, with a spread of 3 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It may require supplemental watering during periods of drought or extended heat. To help this plant achive its best flowering performance, periodically apply a flower-boosting fertilizer from early spring through into the active growing season. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid.

Lady Emma Hamilton Rose makes a fine choice for the outdoor landscape, but it is also well-suited for use in outdoor pots and containers. With its upright habit of growth, it is best suited for use as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when grown in a container, it may not perform exactly as indicated on the tag - this is to be expected. Also note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
