Plant Height: 8 inches

Flower Height: 12 inches

Spread: 14 inches

Spacing: 18 inches

Sunlight:

Hardiness Zone: 7

Other Names: Peruvian Lily

Description:

This beautiful and intriguing variety presents fuchsia-pink blooms with touches of coral and flecked with burgundy; crisp green foliage adds great interest contrast to beds, borders and containers; excellent cut flower quality

Ornamental Features

Lilian Princess Lilies Alstroemeria features showy bracted fuchsia trumpet-shaped flowers with coral-pink overtones and burgundy stripes at the ends of the stems from late spring to early fall. The flowers are excellent for cutting. Its attractive crinkled pointy leaves remain green in color throughout the season.

Landscape Attributes

Lilian Princess Lilies Alstroemeria is an herbaceous perennial with a mounded form. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This is a relatively low maintenance plant, and usually looks its best without pruning, although it will tolerate pruning. It is a good choice for attracting bees, butterflies and hummingbirds to your yard. It has no significant negative characteristics.

Lilian Princess Lilies Alstroemeria is recommended for the following landscape applications;

- Mass Planting
- General Garden Use
- Container Planting

Planting & Growing

Lilian Princess Lilies Alstroemeria will grow to be about 8 inches tall at maturity extending to 12 inches tall with the flowers, with a spread of 14 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 18 inches apart. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 5 years. As an herbaceous perennial, this plant will usually die back to the crown each winter, and will regrow from the base each spring. Be careful not to disturb the crown in late winter when it may not be readily seen!

This plant does best in full sun to partial shade. It does best in average to evenly moist conditions, but will not tolerate standing water. It may require supplemental watering during periods of drought or extended heat. To help this plant achive its best flowering performance, periodically apply a flower-boosting fertilizer from early spring through into the active growing season. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. Consider covering it with a thick layer of mulch in winter to protect it in exposed locations or colder microclimates. This particular variety is an interspecific hybrid.

Lilian Princess Lilies Alstroemeria is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers and foliage against which the thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
