Plant Height: 6 inches

Flower Height: 12 inches

Spread: 18 inches

Spacing: 12 inches

Sunlight: ◐ ●

Hardiness Zone: 10

Other Names: Felted Pepperface

Description:

This stunning plant features round to oval deep green foliage covered with fine white hairs, creating a fuzzy appearance; flower stalks with tiny white flowers may appear, but are not showy; low to bright light, but no direct sun

Features & Attributes

Felted Peperomia's attractive textured heart-shaped leaves remain dark green in color with hints of silver throughout the year on a plant with a mounded habit of growth. The brick red stems are very effective and add to the plant's interest.

This is an herbaceous evergreen houseplant with a mounded form. This plant may benefit from an occasional pruning to look its best.

Planting & Growing

When grown indoors, Felted Peperomia can be expected to grow to be only 6 inches tall at maturity extending to 12 inches tall with the flowers, with a spread of 18 inches. It grows at a slow rate, and under ideal conditions can be expected to live for approximately 5 years. This houseplant performs well in both bright or indirect sunlight and strong artificial light, and can therefore be situated in almost any well-lit room or location. It is very adaptable to both dry and moist soil, but will not tolerate any standing water. The surface of the soil shouldn't be allowed to dry out completely, and so you should expect to water this plant once and possibly even twice each week. Be aware that your particular watering schedule may vary depending on its location in the room, the pot size, plant size and other conditions; if in doubt, ask one of our experts in the store for advice. It will benefit from a regular feeding with a general-purpose fertilizer with every second or third watering. It is not particular as to soil type or pH; an average potting soil should work just fine.

There are many factors that will affect the ultimate height, spread and overall performance of a plant when grown indoors; among them, the size of the pot it's growing in, the amount of light it receives, watering frequency, the pruning regimen and repotting schedule. Use the information described here as a guideline only; individual performance can and will vary. Please contact the store to speak with one of our experts if you are interested in further details concerning recommendations on pot size, watering, pruning, repotting, etc.

-- THIS IS A HOUSEPLANT AND IS NOT MEANT TO SURVIVE THE WINTER OUTDOORS IN OUR CLIMATE --
