Height: 40 feet

Spread: 20 feet

Sunlight:

Hardiness Zone: 2

Other Names: Large-Toothed Aspen

Description:

A picturesque bigtooth aspen with smooth whitish bark, a balanced branching habit and attractive leaves that flutter in the wind; a great choice for naturalization; fast growing and tolerant of varying conditions; chlorosis resistant

Ornamental Features

Grandmont Bigtooth Aspen has dark green deciduous foliage on a tree with a pyramidal habit of growth. The serrated oval leaves turn an outstanding yellow in the fall. The smooth grayish green bark adds an interesting dimension to the landscape.

Landscape Attributes

Grandmont Bigtooth Aspen is an open deciduous tree with a distinctive and refined pyramidal form. Its relatively coarse texture can be used to stand it apart from other landscape plants with finer foliage.

This is a relatively low maintenance tree, and is best pruned in late winter once the threat of extreme cold has passed. It has no significant negative characteristics.

Grandmont Bigtooth Aspen is recommended for the following landscape applications;

- Accent
- Shade
- Naturalizing And Woodland Gardens

Planting & Growing

Grandmont Bigtooth Aspen will grow to be about 40 feet tall at maturity, with a spread of 20 feet. It has a high canopy with a typical clearance of 5 feet from the ground, and should not be planted underneath power lines. It grows at a fast rate, and under ideal conditions can be expected to live for 60 years or more.

This tree should only be grown in full sunlight. It is an amazingly adaptable plant, tolerating both dry conditions and even some standing water. It may require supplemental watering during periods of drought or extended heat. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This is a selection of a native North American species.
