Plant Height: 8 inches

Flower Height: 12 inches

Spread: 12 inches

Spacing: 8 inches

Sunlight:

Hardiness Zone: 8

Other Names: Beggarticks

Group/Class: Bidy Boom Series

Description:

Large bright yellow blooms are presented this vigorous, mounded selection; neat habit with dense branching and ferny green foliage; continuous blooming, from late spring to mid fall; low maintenance, remove spent flowers to promote new growth

Ornamental Features

Bidy Boom Sunglow Bidens has masses of beautiful yellow daisy flowers with gold centers at the ends of the stems from late spring to mid fall, which are most effective when planted in groupings. Its deeply cut ferny leaves remain green in color throughout the season.

Landscape Attributes

Bidy Boom Sunglow Bidens is an herbaceous perennial with a mounded form. It brings an extremely fine and delicate texture to the garden composition and should be used to full effect.

This is a relatively low maintenance plant, and should not require much pruning, except when necessary, such as to remove dieback. It is a good choice for attracting butterflies to your yard. It has no significant negative characteristics.

Bidy Boom Sunglow Bidens is recommended for the following landscape applications;

- Mass Planting
- Rock/Alpine Gardens
- Border Edging
- General Garden Use
- Container Planting

Planting & Growing

Bidy Boom Sunglow Bidens will grow to be about 8 inches tall at maturity extending to 12 inches tall with the flowers, with a spread of 12 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 8 inches apart. Its foliage tends to remain low and dense right to the ground. It grows at a fast rate, and tends to be biennial, meaning that it puts on vegetative growth the first year, flowers the second, and then dies. As an herbaceous perennial, this plant will usually die back to the crown each winter, and will regrow from the base each spring. Be careful not to disturb the crown in late winter when it may not be readily seen!

This plant does best in full sun to partial shade. It does best in average to evenly moist conditions, but will not tolerate standing water. It may require supplemental watering during periods of drought or extended heat. This plant should not require much in the way of fertilizing once established, although it may appreciate a shot of general-purpose fertilizer from time to time early in the growing season. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid. It can be propagated by cuttings; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Bidy Boom Sunglow Bidens is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers against which the thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
