Height: 10 inches

Spread: 14 inches

Spacing: 12 inches

Sunlight:

Hardiness Zone: 7

Description:

This series features well branched, upright mounded plants, producing an abundance of beautiful blooms with an extended flowering period; drought tolerant once established; adds a colorful, dramatic look to mass plantings and containers

Ornamental Features

Besties Devoted Purple African Daisy is bathed in stunning purple daisy flowers with plum purple overtones and powder blue centers at the ends of the stems from late spring to mid fall. The flowers are excellent for cutting. Its spiny narrow leaves remain green in color throughout the season.

Landscape Attributes

Besties Devoted Purple African Daisy is an herbaceous perennial with a mounded form. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This plant will require occasional maintenance and upkeep. Trim off the flower heads after they fade and die to encourage more blooms late into the season. Deer don't particularly care for this plant and will usually leave it alone in favor of tastier treats. It has no significant negative characteristics.

Besties Devoted Purple African Daisy is recommended for the following landscape applications;

- Mass Planting
- Rock/Alpine Gardens
- Border Edging
- General Garden Use
- Container Planting
- Hanging Baskets

Planting & Growing

Besties Devoted Purple African Daisy will grow to be about 8 inches tall at maturity, with a spread of 14 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 12 inches apart. Its foliage tends to remain low and dense right to the ground. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 5 years. As an herbaceous perennial, this plant will usually die back to the crown each winter, and will regrow from the base each spring. Be careful not to disturb the crown in late winter when it may not be readily seen!

This plant should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It may require supplemental watering during periods of drought or extended heat. This plant does not require much in the way of fertilizing once established. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selected variety of a species not originally from North America.

Besties Devoted Purple African Daisy is a fine choice for the garden, but it is also a good selection for planting in outdoor containers and hanging baskets. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers against which the thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
