Height: 24 inches

Spread: 24 inches

Sunlight: ◐ ●

Hardiness Zone: 5

Description:

This attractive compact shrub presents shiny green foliage and sweetly fragrant, two toned pink and white blooms in early spring; flowering is followed by red berries that turn black over summer and persist into fall

Ornamental Features

Sweet And Lo Sweet Box is primarily grown for its highly ornamental fruit. It features an abundance of magnificent red berries from early summer to late fall, which fade to black over time. It has attractive dark green evergreen foliage which emerges light green in spring. The large glossy narrow leaves are highly ornamental and remain dark green throughout the winter. It features dainty clusters of fragrant white flowers with hot pink overtones along the branches from early spring to mid summer.

Landscape Attributes

Sweet And Lo Sweet Box is a dense multi-stemmed evergreen shrub with a mounded form. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This shrub will require occasional maintenance and upkeep, and should only be pruned after flowering to avoid removing any of the current season's flowers. It is a good choice for attracting birds to your yard. It has no significant negative characteristics.

Sweet And Lo Sweet Box is recommended for the following landscape applications;

- Accent
- Mass Planting
- Hedges/Screening
- General Garden Use
- Groundcover
- Container Planting

Planting & Growing

Sweet And Lo Sweet Box will grow to be about 24 inches tall at maturity, with a spread of 24 inches. It has a low canopy. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 30 years.

This shrub does best in partial shade to full shade. Keep it well away from hot, dry locations that receive direct afternoon sun or which get reflected sunlight, such as against the south side of a white wall. It does best in average to evenly moist conditions, but will not tolerate standing water. It may require supplemental watering during periods of drought or extended heat. This plant should not require much in the way of fertilizing once established, although it may appreciate a shot of general-purpose fertilizer from time to time early in the growing season. It is particular about its soil conditions, with a strong preference for rich, acidic soils. It is somewhat tolerant of urban pollution. This is a selected variety of a species not originally from North America.

Sweet And Lo Sweet Box makes a fine choice for the outdoor landscape, but it is also well-suited for use in outdoor pots and containers. It can be used either as 'filler' or as a 'thriller' in the 'spiller-thriller-filler' container combination, depending on the height and form of the other plants used in the container planting. It is even sizeable enough that it can be grown alone in a suitable container. Note that when grown in a container, it may not perform exactly as indicated on the tag - this is to be expected. Also note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
