Height: 3 feet

Spread: 4 feet

Sunlight:

Hardiness Zone: 4

Other Names: Slender Deutzia

Description:

Clusters of white mockorange-like flowers cover this attractive shrub in early summer, while the gold-splashed foliage is stunning the rest of the season; a fine color accent for the garden

Ornamental Features

Golden Deutzia is bathed in stunning racemes of lightly-scented white trumpet-shaped flowers along the branches from mid to late spring. It has attractive chartreuse deciduous foliage which emerges gold in spring. The serrated pointy leaves are highly ornamental but do not develop any appreciable fall color.

Landscape Attributes

Golden Deutzia is a multi-stemmed deciduous shrub with a more or less rounded form. Its relatively fine texture sets it apart from other landscape plants with less refined foliage.

This is a high maintenance shrub that will require regular care and upkeep, and should only be pruned after flowering to avoid removing any of the current season's flowers. It has no significant negative characteristics.

Golden Deutzia is recommended for the following landscape applications;

- Mass Planting
- Hedges/Screening
- General Garden Use
- Container Planting

Planting & Growing

Golden Deutzia will grow to be about 3 feet tall at maturity, with a spread of 4 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a slow rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub should only be grown in full sunlight. It is very adaptable to both dry and moist locations, and should do just fine under typical garden conditions. It may require supplemental watering during periods of drought or extended heat. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selected variety of a species not originally from North America.

Golden Deutzia makes a fine choice for the outdoor landscape, but it is also well-suited for use in outdoor pots and containers. Because of its height, it is often used as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when grown in a container, it may not perform exactly as indicated on the tag - this is to be expected. Also note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
