Height: 30 inches

Spread: 3 feet

Sunlight: ○ ◐

Hardiness Zone: 4

Description:

One of the very hardiest of the boxwood varieties, this gem forms a small rounded ball even without pruning, excellent in rock gardens or as a low hedge; best to plant in sheltered locations

Ornamental Features

Saskatoon Boxwood is primarily valued in the garden for its ornamental globe-shaped form. It has rich green evergreen foliage. The small round leaves remain green throughout the winter.

Landscape Attributes

Saskatoon Boxwood is a dense multi-stemmed evergreen shrub with a more or less rounded form. It lends an extremely fine and delicate texture to the landscape composition which should be used to full effect.

This is a relatively low maintenance shrub, and can be pruned at anytime. It is a good choice for attracting bees to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. It has no significant negative characteristics.

Saskatoon Boxwood is recommended for the following landscape applications;

- Mass Planting
- Rock/Alpine Gardens
- Border Edging
- General Garden Use
- Topiary
- Container Planting

Planting & Growing

Saskatoon Boxwood will grow to be about 30 inches tall at maturity, with a spread of 3 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a slow rate, and under ideal conditions can be expected to live for approximately 30 years.

This shrub does best in full sun to partial shade. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It may require supplemental watering during periods of drought or extended heat. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments, and will benefit from being planted in a relatively sheltered location. This particular variety is an interspecific hybrid.

Saskatoon Boxwood makes a fine choice for the outdoor landscape, but it is also well-suited for use in outdoor pots and containers. It can be used either as 'filler' or as a 'thriller' in the 'spiller-thriller-filler' container combination, depending on the height and form of the other plants used in the container planting. It is even sizeable enough that it can be grown alone in a suitable container. Note that when grown in a container, it may not perform exactly as indicated on the tag - this is to be expected. Also note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
