Aztec Treasure Hosta

Hosta 'Aztec Treasure'

Plant Height: 8 inches

Flower Height: 12 inches

Spread: 24 inches

Spacing: 20 inches

Sunlight: ◐ ●

Hardiness Zone: 2

Other Names: Plantain Lily, Funkia

Description:

Mounds of heart-shaped and wrinkled chartreuse leaves add color, texture and contrast to shaded borders, beds and containers; light lavender flower rise above on arching scapes during the midsummer; easy to grow and low maintenance

Ornamental Features

Aztec Treasure Hosta features dainty spikes of lavender tubular flowers rising above the foliage from early to mid summer. Its attractive large textured heart-shaped leaves remain chartreuse in color throughout the season.

Landscape Attributes

Aztec Treasure Hosta is a dense herbaceous perennial with tall flower stalks held atop a low mound of foliage. Its relatively coarse texture can be used to stand it apart from other garden plants with finer foliage.

This is a relatively low maintenance plant, and is best cleaned up in early spring before it resumes active growth for the season. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Insects

Aztec Treasure Hosta is recommended for the following landscape applications;

Planting & Growing

Aztec Treasure Hosta will grow to be about 8 inches tall at maturity extending to 12 inches tall with the flowers, with a spread of 24 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 20 inches apart. Its foliage tends to remain low and dense right to the ground. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years. As an herbaceous perennial, this plant will usually die back to the crown each winter, and will regrow from the base each spring. Be careful not to disturb the crown in late winter when it may not be readily seen!

This plant does best in partial shade to full shade. Keep it well away from hot, dry locations that receive direct afternoon sun or which get reflected sunlight, such as against the south side of a white wall. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It may require supplemental watering during periods of drought or extended heat. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.
