Height: 3 feet

Spread: 3 feet

Sunlight: ○ ◐

Hardiness Zone: 4

Other Names: Norwegian Spruce

Description:

This miniature evergreen shrub forms a small, rich green bun of fine-textured foliage, adaptable and hardy; excellent choice for rock gardens, garden accent, containers, and detail use in a composition

Ornamental Features

Pitt Cemetery Norway Spruce is a dwarf conifer which is primarily valued in the garden for its ornamental globe-shaped form. It has grayish green evergreen foliage which emerges light green in spring. The needles remain grayish green throughout the winter.

Landscape Attributes

Pitt Cemetery Norway Spruce is a dense multi-stemmed evergreen shrub with a more or less rounded form. It lends an extremely fine and delicate texture to the landscape composition which should be used to full effect.

This is a relatively low maintenance shrub. When pruning is necessary, it is recommended to only trim back the new growth of the current season, other than to remove any dieback. Deer don't particularly care for this plant and will usually leave it alone in favor of tastier treats. It has no significant negative characteristics.

Pitt Cemetery Norway Spruce is recommended for the following landscape applications;

- Mass Planting
- General Garden Use
- Container Planting

Planting & Growing

Pitt Cemetery Norway Spruce will grow to be about 3 feet tall at maturity, with a spread of 3 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a slow rate, and under ideal conditions can be expected to live for 50 years or more.

This shrub does best in full sun to partial shade. It does best in average to evenly moist conditions, but will not tolerate standing water. It may require supplemental watering during periods of drought or extended heat. It is not particular as to soil type or pH, and is able to handle environmental salt. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selected variety of a species not originally from North America.

Pitt Cemetery Norway Spruce makes a fine choice for the outdoor landscape, but it is also well-suited for use in outdoor pots and containers. Because of its height, it is often used as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when grown in a container, it may not perform exactly as indicated on the tag - this is to be expected. Also note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
