River Mist Northern Sea Oats

Chasmanthium latifolium 'River Mist'

Height: 3 feet

Spread: 3 feet

Sunlight: ○ ◐

Hardiness Zone: 4

Other Names: Uniola latifolia

Description:

This grass is grown for its stunning varigated foliage and arching seed heads; the seed heads mature to a purple-bronze color and make a nice accent when left on through the winter; use for flower arrangements

Ornamental Features

River Mist Northern Sea Oats is primarily grown for its highly ornamental fruit. It produces abundant clusters of coppery-bronze hop-like fruit from late summer to late fall. It attractive grassy leaves are light green in color with prominent white stripes. As an added bonus, the foliage turns a gorgeous coppery-bronze in the fall.

Landscape Attributes

River Mist Northern Sea Oats is an herbaceous perennial grass with a shapely form and gracefully arching stems. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This is a relatively low maintenance plant, and is best cleaned up in early spring before it resumes active growth for the season. It has no significant negative characteristics.

River Mist Northern Sea Oats is recommended for the following landscape applications;

- Accent
- Mass Planting
- Border Edging
- General Garden Use
- Naturalizing And Woodland Gardens
- Container Planting

Planting & Growing

River Mist Northern Sea Oats will grow to be about 30 inches tall at maturity, with a spread of 3 feet. Its foliage tends to remain dense right to the ground, not requiring facer plants in front. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years. As an herbaceous perennial, this plant will usually die back to the crown each winter, and will regrow from the base each spring. Be careful not to disturb the crown in late winter when it may not be readily seen!

This plant does best in full sun to partial shade. It is quite adaptable, prefering to grow in average to wet conditions, and will even tolerate some standing water. It may require supplemental watering during periods of drought or extended heat. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This is a selection of a native North American species.

River Mist Northern Sea Oats is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. Because of its height, it is often used as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
