Height: 18 inches

Spread: 24 inches

Sunlight: ○ ◐

Hardiness Zone: 6

Other Names: Margret Hebe; Shrubby Veronica

Description:

Pretty lilac-blue flowers grace this attractive shrub throughout the summer; glossy leaves add interest all season; perfect for adding lasting color to a shrub border, and is also a great container plant

Ornamental Features

Margaret Hebe has masses of beautiful corymbs of lilac purple flowers with white overtones rising above the foliage from early summer to early fall, which emerge from distinctive white flower buds, and which are most effective when planted in groupings. It has attractive green evergreen foliage. The glossy pointy leaves are highly ornamental and remain green throughout the winter.

Landscape Attributes

Margaret Hebe is an open multi-stemmed evergreen shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This is a relatively low maintenance shrub, and should only be pruned after flowering to avoid removing any of the current season's flowers. It is a good choice for attracting birds, bees and butterflies to your yard. It has no significant negative characteristics.

Margaret Hebe is recommended for the following landscape applications;

- Mass Planting
- General Garden Use
- Container Planting

Planting & Growing

Margaret Hebe will grow to be about 14 inches tall at maturity, with a spread of 24 inches. It has a low canopy. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years.

This shrub does best in full sun to partial shade. It does best in average to evenly moist conditions, but will not tolerate standing water. It may require supplemental watering during periods of drought or extended heat. It is not particular as to soil type or pH, and is able to handle environmental salt. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid.

Margaret Hebe makes a fine choice for the outdoor landscape, but it is also well-suited for use in outdoor pots and containers. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers and foliage against which the larger thriller plants stand out. Note that when grown in a container, it may not perform exactly as indicated on the tag - this is to be expected. Also note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
