Height: 19 feet

Spread: 10 feet

Sunlight: ○ ◐

Hardiness Zone: 7

Other Names: Chilean Myrtle, Temu, Arrayan, Palo Colorado

Description:

Showy, fragrant white flowers and amazing gold variegated leaves emerge tinged with pink; keep shrub form to reach the edible, juicy, black berries; prune lower branches to show off the wonderful exfoliating orange bark; a large tree in hotter climate

Ornamental Features

Glanleam Gold Orange-bark Myrtle features showy fragrant white cup-shaped flowers along the branches in mid summer. It features an abundance of magnificent black berries in late fall. It has gold-variegated dark green foliage with hints of creamy white which emerges rose in spring. The glossy pointy leaves remain dark green throughout the winter. The peeling orange bark is extremely showy and adds significant winter interest.

Landscape Attributes

Glanleam Gold Orange-bark Myrtle is a multi-stemmed evergreen shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This is a relatively low maintenance shrub, and is best pruned in late winter once the threat of extreme cold has passed. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Self-Seeding

Glanleam Gold Orange-bark Myrtle is recommended for the following landscape applications;

- Accent
- Mass Planting
- Hedges/Screening
- General Garden Use
- Topiary

Planting & Growing

Glanleam Gold Orange-bark Myrtle will grow to be about 19 feet tall at maturity, with a spread of 10 feet. It has a low canopy, and is suitable for planting under power lines. It grows at a medium rate, and under ideal conditions can be expected to live for 80 years or more.

This shrub does best in full sun to partial shade. It does best in average to evenly moist conditions, but will not tolerate standing water. It may require supplemental watering during periods of drought or extended heat. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This is a selected variety of a species not originally from North America.
