

**Panache™ Berrylicious Petunia**  
*Petunia 'Panache Berrylicious'*

Height: 8 inches

Spread: 12 inches

Spacing: 10 inches

Sunlight: ☉

Hardiness Zone: (annual)

Group/Class: Panache Series

**Description:**

A wonderful selection for containers, baskets, or landscape use; a brilliant combination of rosy pink with cherry red veins; weather resistant and vigorous; blooms consistently throughout the season

**Ornamental Features**

Panache Berrylicious Petunia is covered in stunning rose trumpet-shaped flowers with purple throats and cherry red veins at the ends of the stems from mid spring to late summer. Its pointy leaves remain green in color throughout the season.

**Landscape Attributes**

Panache Berrylicious Petunia is a dense herbaceous annual with a mounded form. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This plant will require occasional maintenance and upkeep. Trim off the flower heads after they fade and die to encourage more blooms late into the season. It is a good choice for attracting butterflies and hummingbirds to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. It has no significant negative characteristics.

Panache Berrylicious Petunia is recommended for the following landscape applications;

- Mass Planting
- Border Edging
- General Garden Use
- Container Planting
- Hanging Baskets

**Planting & Growing**

Panache Berrylicious Petunia will grow to be about 8 inches tall at maturity, with a spread of 12 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 10 inches apart. Its foliage tends to remain low and dense right to the ground. This fast-growing annual will normally live for one full growing season, needing replacement the following year.

This plant should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid. It can be propagated by cuttings; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Panache Berrylicious Petunia is a fine choice for the garden, but it is also a good selection for planting in outdoor containers and hanging baskets. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers against which the thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
