

## Red Pinecone Shrimp Plant

*Justicia brandegeana 'Red Pinecone'*

Height: 3 feet

Spread: 24 inches

Sunlight:

Hardiness Zone: 8a

Other Names: *Justicia brandegeana*, syn. *Beloperone guttata*

### Description:

This clump forming shrub produces showy bright orange-red bracts that resemble small pinecones; white flowers emerge from the bracts from spring to fall; evergreen in frost free areas; perfect for indoor containers and hanging baskets in colder climates

### Features & Attributes

Red Pinecone Shrimp Plant features showy white tubular flowers with shell pink overtones and brick red bracts at the ends of the branches from early winter to late fall. Its textured oval leaves emerge chartreuse, turning light green in color throughout the year.

This is a dense multi-stemmed evergreen houseplant with an upright spreading habit of growth. This plant may benefit from an occasional pruning to look its best.

### Planting & Growing

When grown indoors, Red Pinecone Shrimp Plant can be expected to grow to be about 3 feet tall at maturity, with a spread of 24 inches. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 10 years. This houseplant will do well in a location that gets either direct or indirect sunlight, although it will usually require a more brightly-lit environment than what artificial indoor lighting alone can provide. It prefers to grow in average to moist soil. The surface of the soil shouldn't be allowed to dry out completely, and so you should expect to water this plant once and possibly even twice each week. Be aware that your particular watering schedule may vary depending on its location in the room, the pot size, plant size and other conditions; if in doubt, ask one of our experts in the store for advice. It will benefit from a regular feeding with a general-purpose fertilizer with every second or third watering. It is not particular as to soil type or pH; an average potting soil should work just fine.

There are many factors that will affect the ultimate height, spread and overall performance of a plant when grown indoors; among them, the size of the pot it's growing in, the amount of light it receives, watering frequency, the pruning regimen and repotting schedule. Use the information described here as a guideline only; individual performance can and will vary. Please contact the store to speak with one of our experts if you are interested in further details concerning recommendations on pot size, watering, pruning, repotting, etc.

*-- THIS IS A HOUSEPLANT AND IS NOT MEANT TO SURVIVE THE WINTER OUTDOORS IN OUR CLIMATE --*
