

## April Moon Rose

*Rosa 'April Moon'*

Height: 3 feet

Spread: 3 feet

Sunlight: 

Hardiness Zone: 4a

Group/Class: Buck Rose

### Description:

An attractive rose that features abundant lemon yellow flowers with red highlights; flowers mature to pale yellow; compact, upright habit, quite adaptable and resistant to disease, a valuable garden shrub; all roses need full sun and well-drained soil

### Ornamental Features

April Moon Rose features showy lightly-scented lemon yellow flowers with gold eyes and red streaks at the ends of the branches from late spring to late summer, which emerge from distinctive red flower buds. The flowers are excellent for cutting. It has dark green deciduous foliage which emerges coppery-bronze in spring. The oval compound leaves turn yellow in fall.

### Landscape Attributes

April Moon Rose is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This shrub will require occasional maintenance and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Spiny

April Moon Rose is recommended for the following landscape applications;

- Mass Planting
- Hedges/Screening
- General Garden Use

**Planting & Growing**

April Moon Rose will grow to be about 3 feet tall at maturity, with a spread of 3 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid.
