

Hakuokan Japanese Ardisia

Ardisia japonica 'Hakuokan'

Height: 16 inches

Spread: 24 inches

Sunlight: ● ●

Hardiness Zone: 6b

Other Names: Variegated Japanese Ardisia, Marlberry; Maleberry

Description:

A rich groundcover perfect for shaded areas that are moist and cool; emerging light green-yellow leaves become gray-green with white edges, and are finely serrated; does not tolerate foot traffic and is not drought tolerant

Ornamental Features

Hakuokan Japanese Ardisia features dainty clusters of pink star-shaped flowers at the ends of the branches in mid spring. It has grayish green foliage edged in white which emerges light green in spring. The serrated pointy leaves remain grayish green throughout the winter. It produces red berries in mid fall.

Landscape Attributes

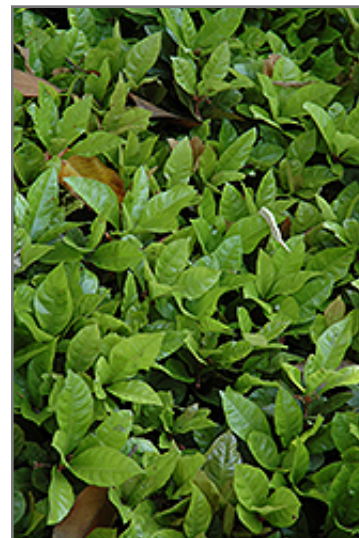

Hakuokan Japanese Ardisia is a dense multi-stemmed evergreen shrub with a ground-hugging habit of growth. Its relatively fine texture sets it apart from other landscape plants with less refined foliage.

This shrub will require occasional maintenance and upkeep. When pruning is necessary, it is recommended to only trim back the new growth of the current season, other than to remove any dieback. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Suckering

Hakuokan Japanese Ardisia is recommended for the following landscape applications;

- Rock/Alpine Gardens
- Groundcover

Planting & Growing

Hakuokan Japanese Ardisia will grow to be about 16 inches tall at maturity, with a spread of 24 inches. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub does best in partial shade to shade. It does best in average to evenly moist conditions, but will not tolerate standing water. It is particular about its soil conditions, with a strong preference for rich, acidic soils. It is somewhat tolerant of urban pollution. This is a selected variety of a species not originally from North America.
