

Marginata Alba Agave
Agave americana 'Marginata Alba'

Plant Height: 6 feet

Flower Height: 15 feet

Spread: 12 feet

Sunlight: ☐

Hardiness Zone: 8a

Other Names: Century Plant

Description:

As an ornamental, this variety is usually grown in rock gardens, cactus and succulent gardens; generally smaller when grown in containers; will tend to dominate the landscape; it is very spiny so not good along walkways but makes a great accent plant

Ornamental Features

Marginata Alba Agave features bold spikes of chartreuse cup-shaped flowers rising above the foliage in mid summer. It has bluish-green foliage edged in creamy white. The succulent sword-like leaves remain bluish-green throughout the winter.

Landscape Attributes

Marginata Alba Agave is a multi-stemmed evergreen shrub with an upright spreading habit of growth. Its strikingly bold and coarse texture can be very effective in a balanced landscape composition.

This shrub will require occasional maintenance and upkeep, and usually looks its best without pruning, although it will tolerate pruning. Deer don't particularly care for this plant and will usually leave it alone in favor of tastier treats. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Suckering
- Spiny

Marginata Alba Agave is recommended for the following landscape applications;

- Accent
- General Garden Use
- Naturalizing And Woodland Gardens
- Container Planting

Planting & Growing

Marginata Alba Agave will grow to be about 6 feet tall at maturity extending to 15 feet tall with the flowers, with a spread of 12 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front, and is suitable for planting under power lines. It grows at a slow rate, and under ideal conditions can be expected to live for approximately 10 years.

This shrub should only be grown in full sunlight. It prefers dry to average moisture levels with very well-drained soil, and will often die in standing water. It is considered to be drought-tolerant, and thus makes an ideal choice for xeriscaping or the moisture-conserving landscape. It is not particular as to soil pH, but grows best in poor soils. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selection of a native North American species. It can be propagated by multiplication of the underground bulbs; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Marginata Alba Agave makes a fine choice for the outdoor landscape, but it is also well-suited for use in outdoor pots and containers. Its large size and upright habit of growth lend it for use as a solitary accent, or in a composition surrounded by smaller plants around the base and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when grown in a container, it may not perform exactly as indicated on the tag - this is to be expected. Also note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
