

## **Pink Deutzia** *Deutzia x rosea*

Height: 6 feet

Spread: 6 feet

Sunlight: ☐

Hardiness Zone: 5a

### **Description:**

A pretty shrub for general garden use, featuring showy pink flowers in spring on arching stems; very attractive in bloom, rather unassuming the rest of the year, excellent in the garden background

### **Ornamental Features**

Pink Deutzia has corymbs of pink bell-shaped flowers along the branches in late spring. It has green deciduous foliage. The pointy leaves do not develop any appreciable fall color.

### **Landscape Attributes**

Pink Deutzia is a dense multi-stemmed deciduous shrub with a shapely form and gracefully arching branches. Its relatively fine texture sets it apart from other landscape plants with less refined foliage.

This is a high maintenance shrub that will require regular care and upkeep, and should only be pruned after flowering to avoid removing any of the current season's flowers. It is a good choice for attracting hummingbirds to your yard. It has no significant negative characteristics.

Pink Deutzia is recommended for the following landscape applications;

- Mass Planting
- Hedges/Screening
- General Garden Use

**Planting & Growing**

Pink Deutzia will grow to be about 6 feet tall at maturity, with a spread of 6 feet. It tends to be a little leggy, with a typical clearance of 1 foot from the ground, and is suitable for planting under power lines. It grows at a slow rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub should only be grown in full sunlight. It is very adaptable to both dry and moist locations, and should do just fine under average home landscape conditions. It is not particular as to soil type or pH, and is able to handle environmental salt. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid.
