

**Blue Yonder Plectranthus**  
*Plectranthus 'Blue Yonder'*

Height: 15 inches

Spread: 24 inches

Sunlight:

Hardiness Zone: 8b

Other Names: Blue Spire Plectranthus, Candleplant, Spur Flower

**Description:**

Attractive spikes of sky blue flowers are impressive when massed above soft green foliage that is edged in white; mounded form should be occasionally trimmed to maintain shape; a lovely addition to containers; heat tolerant

**Features & Attributes**

Blue Yonder Plectranthus features showy spikes of sky blue flowers rising above the foliage from mid spring to late fall. Its attractive serrated pointy leaves remain green in color with distinctive white edges throughout the year.

This is an herbaceous evergreen houseplant with tall flower stalks held atop a low mound of foliage. Its relatively fine texture sets it apart from other indoor plants with less refined foliage. This plant can be pruned at any time to keep it looking its best.

**Planting & Growing**

When grown indoors, Blue Yonder Plectranthus can be expected to grow to be about 12 inches tall at maturity, with a spread of 24 inches. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 5 years. This houseplant will do well in a location that gets either direct or indirect sunlight, although it will usually require a more brightly-lit environment than what artificial indoor lighting alone can provide. It is very adaptable to both dry and moist soil, but will not tolerate any standing water. The surface of the soil shouldn't be allowed to dry out completely, and so you should expect to water this plant once and possibly even twice each week. Be aware that your particular watering schedule may vary depending on its location in the room, the pot size, plant size and other conditions; if in doubt, ask one of our experts in the store for advice. It is not particular as to soil type or pH; an average potting soil should work just fine.

There are many factors that will affect the ultimate height, spread and overall performance of a plant when grown indoors; among them, the size of the pot it's growing in, the amount of light it receives, watering frequency, the pruning regimen and repotting schedule. Use the information described here as a guideline only; individual performance can and will vary. Please contact the store to speak with one of our experts if you are interested in further details concerning recommendations on pot size, watering, pruning, repotting, etc.
