

Hines Gold® Japanese Euonymus

Euonymus japonicus 'Hines Gold'

Height: 10 feet

Spread: 6 feet

Sunlight: ○ ● ●

Hardiness Zone: 5b

Other Names: syn. *Euonymus japonicus Aureovariegatus*

Description:

Bright, glossy golden-yellow foliage features wide, dark green margins; seaside salt tolerance; a great hedge plant with light dense branches that tolerate shearing for a formal appearance, or leave to its natural shape

Ornamental Features

Hines Gold Japanese Euonymus has attractive gold foliage edged in dark green on a plant with an upright spreading habit of growth. The glossy oval leaves are highly ornamental and remain gold throughout the winter.

Landscape Attributes

Hines Gold Japanese Euonymus is a dense multi-stemmed evergreen shrub with an upright spreading habit of growth. Its relatively fine texture sets it apart from other landscape plants with less refined foliage.

This shrub will require occasional maintenance and upkeep, and can be pruned at anytime. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Insects

Hines Gold Japanese Euonymus is recommended for the following landscape applications;

- Mass Planting
- Hedges/Screening
- General Garden Use
- Topiary

Planting & Growing

Hines Gold Japanese Euonymus will grow to be about 10 feet tall at maturity, with a spread of 6 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front, and is suitable for planting under power lines. It grows at a fast rate, and under ideal conditions can be expected to live for 40 years or more.

This shrub performs well in both full sun and full shade. It is very adaptable to both dry and moist locations, and should do just fine under average home landscape conditions. It is not particular as to soil type or pH, and is able to handle environmental salt. It is highly tolerant of urban pollution and will even thrive in inner city environments, and will benefit from being planted in a relatively sheltered location. This is a selected variety of a species not originally from North America.
