

**Fioretto 70 Sprouting Cauliflower***Brassica oleracea var. botrytis 'Fioretto 70'*

Height: 18 inches

Spread: 12 inches

Spacing: 18 inches

Sunlight: ☐

Hardiness Zone: (annual)

Description:

A fast maturing variety of sweet sprouting cauliflower; tiny, white florets are grown in dense clusters atop of long and narrow light green stems; perfect for kitchen or market gardens; sweet and crunchy, excellent when grilled, roasted or added to salad

Edible Qualities

Fioretto 70 Sprouting Cauliflower is an annual vegetable plant that is commonly grown for its edible qualities. The round green tightly-wrapped heads of foliage are typically harvested when mature. The heads have a sweet taste and a crunchy texture.

The heads are most often used in the following ways:

- Fresh Eating
- Eating When Cooked/Prepared
- Cooking
- Pickling

Planting & Growing

Fioretto 70 Sprouting Cauliflower will grow to be about 18 inches tall at maturity, with a spread of 12 inches. When planted in rows, individual plants should be spaced approximately 18 inches apart. This fast-growing vegetable plant is an annual, which means that it will grow for one season in your garden and then die after producing a crop.

This plant is typically grown in a designated vegetable garden. It should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It may require supplemental watering during periods of drought or extended heat. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This is a selected variety of a species not originally from North America.

Fioretto 70 Sprouting Cauliflower is a good choice for the vegetable garden, but it is also well-suited for use in outdoor pots and containers. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing the canvas against which the thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
