

Candlelight® Hydrangea (tree form)

Hydrangea paniculata 'HPOPR013'

Height: 6 feet

Spread: 4 feet

Sunlight: ☐ ☒

Hardiness Zone: 3

Description:

Large, candle shaped flower heads emerge white, blush pink, then transition slowly to bright red as the summer fades; strong, deep red stems carry the blooms all season, then provide winter interest; pruned to a single stem

Ornamental Features

Candlelight Hydrangea (tree form) features bold conical white flowers with pink overtones at the ends of the branches from mid summer to late fall. The flowers are excellent for cutting. It has green deciduous foliage. The pointy leaves do not develop any appreciable fall color. The smooth gray bark and dark red branches add an interesting dimension to the landscape.

Landscape Attributes

Candlelight Hydrangea (tree form) is a deciduous shrub, selected and trained to grow in a small tree-like form with the primary plant grafted high atop a standard. Its relatively coarse texture can be used to stand it apart from other landscape plants with finer foliage.

This shrub will require occasional maintenance and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. It has no significant negative characteristics.

Candlelight Hydrangea (tree form) is recommended for the following landscape applications;

- Accent
- Vertical Accent
- General Garden Use

Planting & Growing

Candlelight Hydrangea (tree form) will grow to be about 6 feet tall at maturity, with a spread of 4 feet. It tends to be a little leggy, with a typical clearance of 2 feet from the ground, and is suitable for planting under power lines. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 30 years.

This shrub does best in full sun to partial shade. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It may require supplemental watering during periods of drought or extended heat. This plant should not require much in the way of fertilizing once established, although it may appreciate a shot of general-purpose fertilizer from time to time early in the growing season. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. Consider applying a thick mulch around the root zone in winter to protect it in exposed locations or colder microclimates. This is a selected variety of a species not originally from North America.
