

## Watereri Bird Cherry

*Prunus padus 'Watereri'*

Height: 30 feet

Spread: 25 feet

Sunlight: 

Hardiness Zone: 3b

Other Names: European Bird Cherry, Mayday

### Description:

An interesting medium sized upright accent tree featuring rising racemes of white flowers in spring followed by tiny bitter fruit, attractive to birds; deep green foliage turns yellow in fall; best in full sun, can be susceptible to black-knot

### Ornamental Features

Watereri Bird Cherry features showy racemes of fragrant white flowers hanging below the branches in mid spring before the leaves. It has dark green deciduous foliage. The pointy leaves turn yellow in fall. The black fruits are held in clusters in late summer. The smooth brown bark adds an interesting dimension to the landscape.

### Landscape Attributes

Watereri Bird Cherry is a deciduous tree with a shapely oval form. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This tree will require occasional maintenance and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. It is a good choice for attracting birds to your yard. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Disease

Watereri Bird Cherry is recommended for the following landscape applications;

- Accent
- Shade

**Planting & Growing**

Watereri Bird Cherry will grow to be about 30 feet tall at maturity, with a spread of 25 feet. It has a low canopy with a typical clearance of 4 feet from the ground, and should not be planted underneath power lines. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 30 years.

This tree should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selected variety of a species not originally from North America.
