

## **All Revved Up Iris** *Iris 'All Revved Up'*

Plant Height: 20 inches

Flower Height: 28 inches

Spread: 20 inches

Spacing: 16 inches

Sunlight: ☐ ☒

Hardiness Zone: 3a

Group/Class: Tall Bearded

### **Description:**

This tall, interesting iris produces pretty lavender blooms with pale yellow-cream falls that are edged in lavender; a stunning addition to the perennial border; also excellent massed in groupings in the garden; will quickly form dense colonies

### **Ornamental Features**

All Revved Up Iris has masses of beautiful lavender flag-like flowers with creamy white overtones and a orange beard at the ends of the stems from mid to late spring, which are most effective when planted in groupings. The flowers are excellent for cutting. Its sword-like leaves remain grayish green in color throughout the season.

### **Landscape Attributes**

All Revved Up Iris is an herbaceous perennial with an upright spreading habit of growth. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This plant will require occasional maintenance and upkeep, and should be cut back in late fall in preparation for winter. Deer don't particularly care for this plant and will usually leave it alone in favor of tastier treats. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Insects

All Revved Up Iris is recommended for the following landscape applications;

- Mass Planting
- General Garden Use

**Planting & Growing**

All Revved Up Iris will grow to be about 20 inches tall at maturity extending to 28 inches tall with the flowers, with a spread of 20 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 16 inches apart. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years. As an herbaceous perennial, this plant will usually die back to the crown each winter, and will regrow from the base each spring. Be careful not to disturb the crown in late winter when it may not be readily seen!

This plant does best in full sun to partial shade. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.
