

**Beni Kujaku Japanese Pine**  
*Pinus 'Beni Kujaku'*

Height: 19 feet

Spread: 10 feet

Sunlight: 

Hardiness Zone: 4b

Other Names: *Pinus densiflora x thunbergii*

**Description:**

An interesting evergreen shrub with dark green needles that are variegated with bright golden yellow bands; a good character plant for the garden, that will add texture and interest year round

**Ornamental Features**

Beni Kujaku Japanese Pine is a dwarf conifer which is primarily valued in the landscape for its ornamental upright and spreading habit of growth. It has attractive gold-variegated dark green foliage. The needles are highly ornamental and remain dark green throughout the winter.

**Landscape Attributes**

Beni Kujaku Japanese Pine is a dense multi-stemmed evergreen shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This shrub will require occasional maintenance and upkeep. When pruning is necessary, it is recommended to only trim back the new growth of the current season, other than to remove any dieback. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Disease

Beni Kujaku Japanese Pine is recommended for the following landscape applications;

- Accent
- Hedges/Screening
- General Garden Use

**Planting & Growing**

Beni Kujaku Japanese Pine will grow to be about 19 feet tall at maturity, with a spread of 10 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front, and is suitable for planting under power lines. It grows at a slow rate, and under ideal conditions can be expected to live for 80 years or more.

This shrub should only be grown in full sunlight. It prefers dry to average moisture levels with very well-drained soil, and will often die in standing water. It is not particular as to soil type or pH, and is able to handle environmental salt. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid.
