### Description:

A vigorous spreading rugosa hybrid producing clusters of bright, single fuchsia-purple flowers in summer; autumn brings orange hips; pleasing fragrance; very disease resistant

### Ornamental Features

Wild Berry Breeze Rose features showy fragrant fuchsia flowers with purple overtones and buttery yellow eyes at the ends of the branches from late spring to mid fall. The flowers are excellent for cutting. It has forest green deciduous foliage which emerges light green in spring. The glossy oval compound leaves turn harvest gold in fall.

### Landscape Attributes

Wild Berry Breeze Rose is a multi-stemmed deciduous shrub with a ground-hugging habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This shrub will require occasional maintenance and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. It is a good choice for attracting bees to your yard. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Spiny

Wild Berry Breeze Rose is recommended for the following landscape applications;

- Accent
- Mass Planting
- Hedges/Screening
- General Garden Use

**Planting & Growing**

Wild Berry Breeze Rose will grow to be about 4 feet tall at maturity, with a spread of 4 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid.
