Height: 6 feet

Spread: 4 feet

Sunlight:

Hardiness Zone: 7b

Group/Class: Hybrid Tea Rose

Description:

This showy variety produces large scarlet blooms speckled with hot pink spots; strong verbena and citrus fragrance; makes a distictive addition to any garden setting; highly disease resistant

Ornamental Features

Cinnamon Dolce Rose features showy fragrant double scarlet flowers with hot pink spots at the ends of the branches from late spring to early fall. The flowers are excellent for cutting. It has dark green deciduous foliage. The glossy oval compound leaves do not develop any appreciable fall colour.

Landscape Attributes

Cinnamon Dolce Rose is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

Cinnamon Dolce Rose

Planting & Growing

Cinnamon Dolce Rose will grow to be about 6 feet tall at maturity, with a spread of 4 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front, and is suitable for planting under power lines. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid.

This plant is not reliably hardy in our region, and certain restrictions may apply; contact the store for more information.
