Fireburst® Paperbark Maple

Acer griseum 'JFS KW8AGRI'

Height: 25 feet

Spread: 18 feet

Sunlight: ○ ◐

Hardiness Zone: 5a

Description:

An upright oval cultivar with superior branch structure, featuring quality dark green foliage that turns brilliant red in fall; visually outstanding reddish-brown exfoliating (peeling) bark ; a highly valued accent tree for the fall and winter landscape

Ornamental Features

Fireburst Paperbark Maple has dark green deciduous foliage on a tree with an oval habit of growth. The compound leaves turn outstanding shades of orange and in the fall. The peeling coppery-bronze bark is extremely showy and adds significant winter interest.

Landscape Attributes

Fireburst Paperbark Maple is a multi-stemmed deciduous tree with a shapely oval form. Its relatively fine texture sets it apart from other landscape plants with less refined foliage.

This is a relatively low maintenance tree, and should only be pruned in summer after the leaves have fully developed, as it may 'bleed' sap if pruned in late winter or early spring. It has no significant negative characteristics.

Fireburst Paperbark Maple is recommended for the following landscape applications;

- Accent
- Shade

Fireburst Paperbark Maple

Planting & Growing

Fireburst Paperbark Maple will grow to be about 25 feet tall at maturity, with a spread of 18 feet. It has a high canopy with a typical clearance of 6 feet from the ground, and should not be planted underneath power lines. As it matures, the lower branches of this tree can be strategically removed to create a high enough canopy to support unobstructed human traffic underneath. It grows at a slow rate, and under ideal conditions can be expected to live for 80 years or more.

This tree does best in full sun to partial shade. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This is a selected variety of a species not originally from North America.

This plant is not reliably hardy in our region, and certain restrictions may apply; contact the store for more information.
