Supertunia Vista® Snowdrift™ Petunia

Petunia 'BBTUN04401'

Height: 24 inches

Spread: 3 feet

Spacing: 20 inches

Sunlight: ○ ◐

Hardiness Zone: (annual)

Group/Class: Supertunia Series

Description:

This outstanding variety offers excellent garden performance, as well as in hanging baskets and patio containers; abundant medium to large flowers on densely branched plants; heat and drought tolerant; little to no maintenance

Ornamental Features

Supertunia Vista Snowdrift Petunia is draped in stunning white trumpet-shaped flowers with yellow throats at the ends of the stems from mid spring to mid fall. Its pointy leaves remain green in colour throughout the season.

Landscape Attributes

Supertunia Vista Snowdrift Petunia is a dense herbaceous annual with a trailing habit of growth, eventually spilling over the edges of hanging baskets and containers. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This plant will require occasional maintenance and upkeep. Trim off the flower heads after they fade and die to encourage more blooms late into the season. It is a good choice for attracting butterflies and hummingbirds to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. It has no significant negative characteristics.

Supertunia Vista Snowdrift Petunia is recommended for the following landscape applications;

Planting & Growing

Supertunia Vista Snowdrift Petunia will grow to be about 24 inches tall at maturity, with a spread of 3 feet. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 20 inches apart. Its foliage tends to remain dense right to the ground, not requiring facer plants in front. This fast-growing annual will normally live for one full growing season, needing replacement the following year.

This plant does best in full sun to partial shade. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid. It can be propagated by cuttings; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Supertunia Vista Snowdrift Petunia is a fine choice for the garden, but it is also a good selection for planting in outdoor containers and hanging baskets. Because of its trailing habit of growth, it is ideally suited for use as a 'spiller' in the 'spiller-thriller-filler' container combination; plant it near the edges where it can spill gracefully over the pot. It is even sizeable enough that it can be grown alone in a suitable container. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
