This shrub will require occasional maintenance and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. It is a good choice for attracting bees to your yard. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Spiny

Julio Iglesias Rose is recommended for the following landscape applications;

- Mass Planting
- Hedges/Screening

It grows at a fast rate, and under ideal conditions can be expected to live for approximately 30 years.
