Height: 3 feet

Spread: 3 feet

Sunlight:

Hardiness Zone: 6b

Group/Class: Hybrid Tea Rose

Description:

Exceptional disease resistance with an upright medium sized habit, this variety produces ample amounts of lemon yellow blooms over light green, glossy foliage; intense, spicy fragrance; great addition to small spaces and garden beds

Ornamental Features

New Day Rose is covered in stunning lightly-scented double lemon yellow flowers at the ends of the branches from late spring to early fall. The flowers are excellent for cutting. It has emerald green deciduous foliage. The glossy oval compound leaves do not develop any appreciable fall colour.

Landscape Attributes

New Day Rose is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This is a high maintenance shrub that will require regular care and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Disease
- Spiny

New Day Rose is recommended for the following landscape applications;

- Mass Planting
- Hedges/Screening
- General Garden Use

New Day Rose

Planting & Growing

New Day Rose will grow to be about 3 feet tall at maturity, with a spread of 3 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. To help this plant achive its best flowering performance, periodically apply a flower-boosting fertilizer from early spring through into the active growing season. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid.

This plant is not reliably hardy in our region, and certain restrictions may apply; contact the store for more information.
