Dreams® Garden MacaRose Begonia

Begonia 'Macarose'

Height: 14 inches

Spread: 10 inches

Spacing: 8 inches

Sunlight: ◐ ●

Hardiness Zone: (annual)

Group/Class: Dreams Series

Description:

An attractive mounded begonia presenting glossy dark green leaves with toothed edges; rosy-pink semi-double blooms are produced from midsummer to frost; grows well in humid conditions; great for containers, or hanging baskets; shade tolerant

Ornamental Features

Dreams Garden MacaRose Begonia features dainty nodding semi-double rose orchid-like flowers with pink overtones and yellow throats at the ends of the stems from early summer to early fall. Its attractive serrated heart-shaped leaves remain forest green in colour throughout the year.

Landscape Attributes

Dreams Garden MacaRose Begonia is an herbaceous annual with a mounded form. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This is a high maintenance plant that will require regular care and upkeep, and usually looks its best without pruning, although it will tolerate pruning. It is a good choice for attracting bees to your yard, but is not particularly attractive to deer who tend to leave it alone in favor of tastier treats. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Disease

Planting & Growing

Dreams Garden MacaRose Begonia will grow to be about 14 inches tall at maturity, with a spread of 10 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 8 inches apart. Its foliage tends to remain dense right to the ground, not requiring facer plants in front. Although it's not a true annual, this plant can be expected to behave as an annual in our climate if left outdoors over the winter, usually needing replacement the following year. As such, gardeners should take into consideration that it will perform differently than it would in its native habitat.

This plant does best in partial shade to shade. It requires an evenly moist well-drained soil for optimal growth, but will die in standing water. This plant should not require much in the way of fertilizing once established, although it may appreciate a shot of general-purpose fertilizer from time to time early in the growing season. It is not particular as to soil pH, but grows best in rich soils. It is somewhat tolerant of urban pollution, and will benefit from being planted in a relatively sheltered location. Consider applying a thick mulch around the root zone over the growing season to conserve soil moisture. This particular variety is an interspecific hybrid. It can be propagated by cuttings; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Dreams Garden MacaRose Begonia is a fine choice for the garden, but it is also a good selection for planting in outdoor containers and hanging baskets. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers and foliage against which the thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
