Height: 4 feet

Spread: 3 feet

Sunlight: ○ ◐

Hardiness Zone: 8b

Other Names: Looking Glass Plant

Description:

Lime green summer foliage with yellow and orange tones, becomes intensely golden-orange as the season progresses toward winter; an extraordinary variety perfect for small hedges or group planting; visually stunning; full sun for best color

Ornamental Features

Golden Glow Mirror Bush has attractive orange-variegated yellow foliage with hints of gold which emerges lime green in spring on a plant with an upright spreading habit of growth. The small glossy oval leaves are highly ornamental and remain yellow throughout the winter. The smooth khaki (brownish-green) bark adds an interesting dimension to the landscape.

Landscape Attributes

Golden Glow Mirror Bush is a multi-stemmed evergreen shrub with an upright spreading habit of growth. It lends an extremely fine and delicate texture to the landscape composition which can make it a great accent feature on this basis alone.

This is a relatively low maintenance shrub, and can be pruned at anytime. It has no significant negative characteristics.

Golden Glow Mirror Bush is recommended for the following landscape applications;

- Mass Planting
- Hedges/Screening
- General Garden Use
- Container Planting

Golden Glow Mirror Bush

Planting & Growing

Golden Glow Mirror Bush will grow to be about 4 feet tall at maturity, with a spread of 3 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub does best in full sun to partial shade. It does best in average to evenly moist conditions, but will not tolerate standing water. This plant should not require much in the way of fertilizing once established, although it may appreciate a shot of general-purpose fertilizer from time to time early in the growing season. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This is a selected variety of a species not originally from North America.

Golden Glow Mirror Bush makes a fine choice for the outdoor landscape, but it is also well-suited for use in outdoor pots and containers. With its upright habit of growth, it is best suited for use as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when grown in a container, it may not perform exactly as indicated on the tag - this is to be expected. Also note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden. Be aware that in our climate, most plants cannot be expected to survive the winter if left in containers outdoors, and this plant is no exception. Contact our experts for more information on how to protect it over the winter months.

This plant is not reliably hardy in our region, and certain restrictions may apply; contact the store for more information.
