Selena™ Red Chrysanthemum

Chrysanthemum 'Selena Red'

Selena Red Chrysanthemum flowers

Height: 24 inches

Spread: 24 inches

Sunlight: ○ ◐

Hardiness Zone: 3b

Other Names: Garden Mum, Korean Mum, Dendranthemum

Description:

A vigorous selection featuring bountiful fully double wine red flowers that completely cover this upright and mounded plant; adaptable to various conditions, ideal for containers on the patio or porch; best in full sun

Ornamental Features

Selena Red Chrysanthemum is covered in stunning fully double ruby-red daisy flowers at the ends of the stems from early to late fall. The flowers are excellent for cutting. Its fragrant lobed leaves remain dark green in colour throughout the season.

Landscape Attributes

Selena Red Chrysanthemum is an herbaceous perennial with a mounded form. Its relatively fine texture sets it apart from other garden plants with less refined foliage.

This is a relatively low maintenance plant, and is best cleaned up in early spring before it resumes active growth for the season. Deer don't particularly care for this plant and will usually leave it alone in favor of tastier treats. It has no significant negative characteristics.

Selena Red Chrysanthemum is recommended for the following landscape applications;

- Mass Planting
- Border Edging
- General Garden Use
- Container Planting

Planting & Growing

Selena Red Chrysanthemum will grow to be about 24 inches tall at maturity, with a spread of 24 inches. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years. As an herbaceous perennial, this plant will usually die back to the crown each winter, and will regrow from the base each spring. Be careful not to disturb the crown in late winter when it may not be readily seen!

Selena Red Chrysanthemum

This plant does best in full sun to partial shade. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Selena Red Chrysanthemum is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. It can be used either as 'filler' or as a 'thriller' in the 'spiller-thriller-filler' container combination, depending on the height and form of the other plants used in the container planting. It is even sizeable enough that it can be grown alone in a suitable container. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden. Be aware that in our climate, most plants cannot be expected to survive the winter if left in containers outdoors, and this plant is no exception. Contact our experts for more information on how to protect it over the winter months.

This plant is not reliably hardy in our region, and certain restrictions may apply; contact the store for more information.
